Navigating daily life.

View a map of nearby food places and scan barcodes or ingredient labels with on-device text recognition.

Strict Messaging: Falah shows source reports and checks ingredients against known lists. It provides strictly evidence for your review, NOT a halal certification.

Designed for everyone.

Five iOS widgets provide at-a-glance information right on your home screen.

Accessibility

Built with large touch targets, clear button text, and larger text setting support—making it effortless for older family members to use. Includes essential tools for Ramadan planning.

Built by a Muslim family in Australia.

Falah was built by Shamal Krishna (Sam) and Hafsah Nuzhat. They wanted a calm, private worship app they actually wanted to open at Fajr—without ads, paywalls, or the pressure to gamify their salah. So, they built it.
