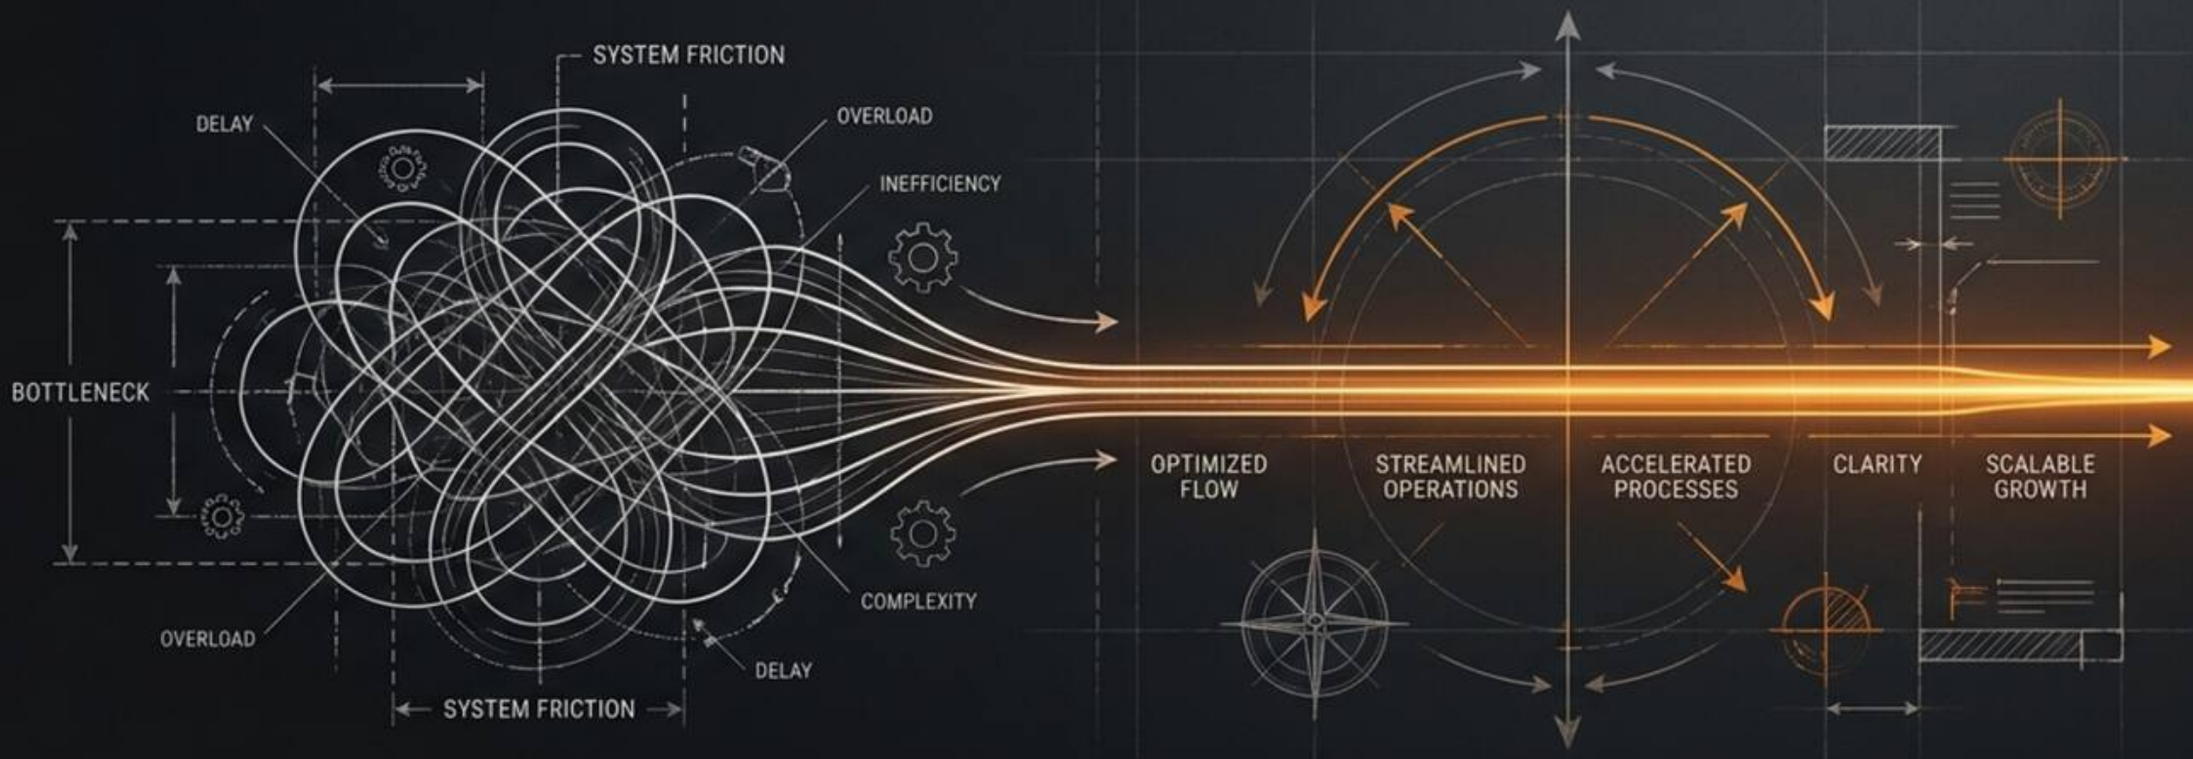
MyKoala



Find what's slowing your business down. Then fix it.

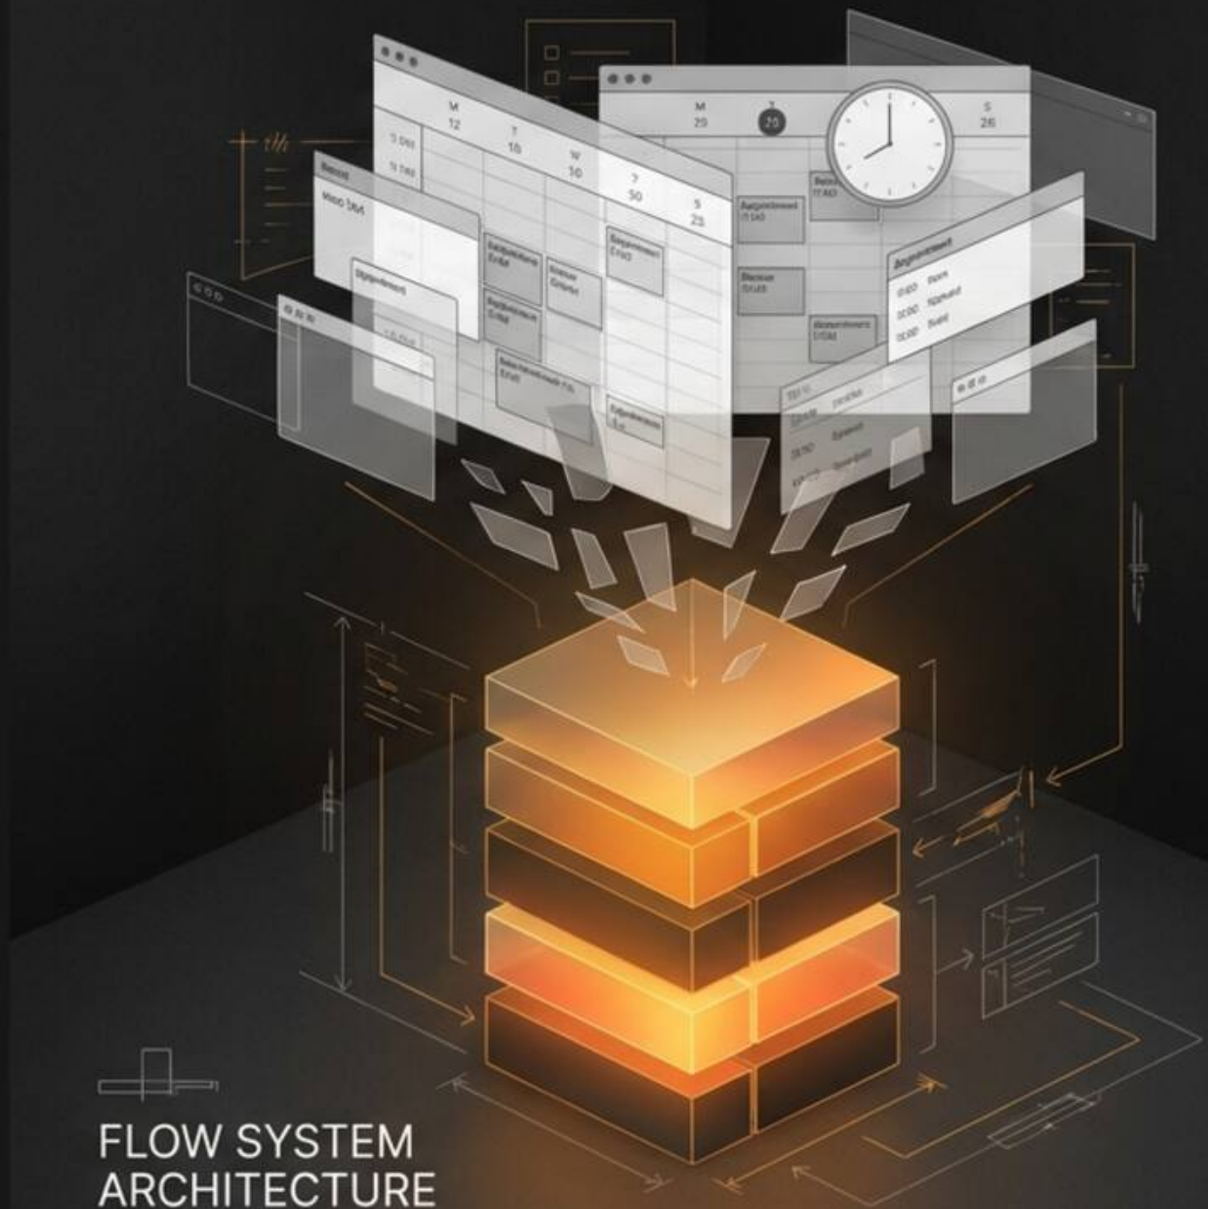
A Guide to Working with MyKoala, Sydney's AI Consulting Agency

We know where the hours go.

MyKoala isn't run by traditional coders who just discovered AI. Founders Sam and Hafsah built software to solve a very specific problem: saving time in their own commercial cleaning business.

We felt the admin. We built systems to handle the bookings, track the quotes, and chase the invoices.

Now, we build those same time-saving tools for your business.



FLOW SYSTEM
ARCHITECTURE

Health & Allied Health

More time with patients. Less time on non-clinical front desk admin.

Service Businesses

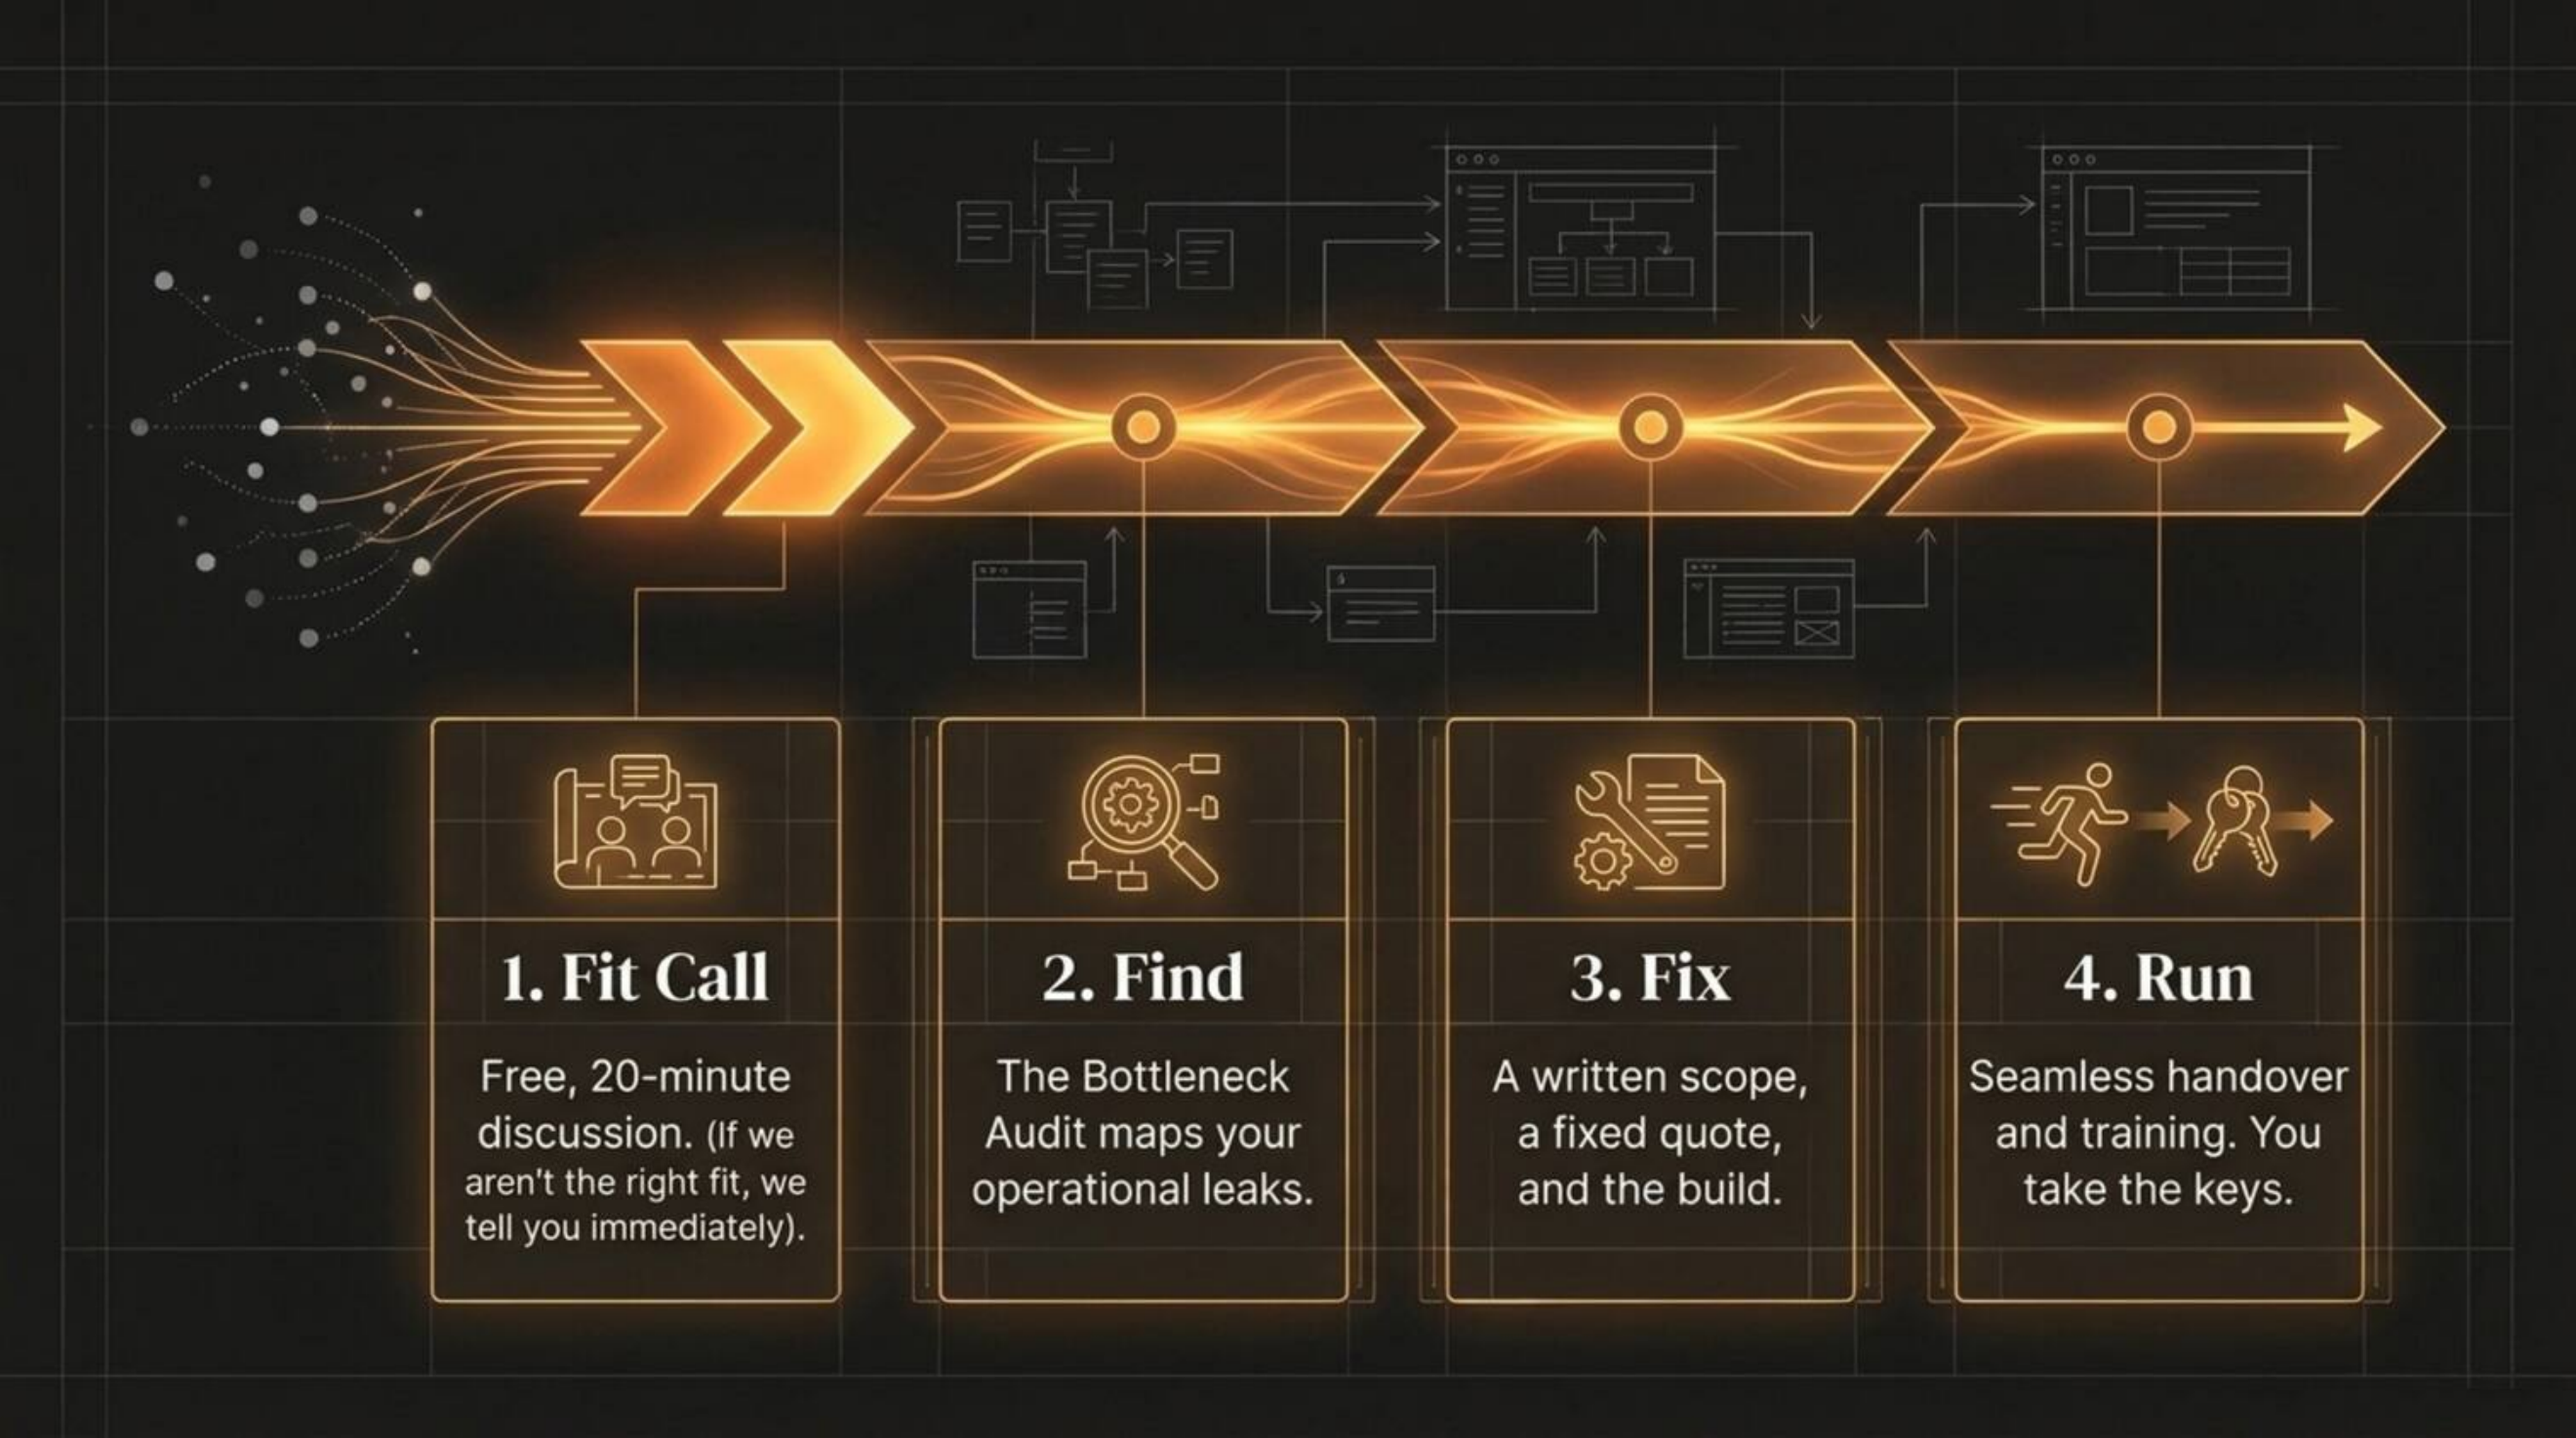
Cleaning, trades, and hire. Faster quotes, cleaner handovers, and getting paid sooner.

Funded Providers

NDIS and community housing. End the double-handling of reporting and referrals.

Small Businesses

New to AI? One targeted problem, one quick win.



1. Fit Call

Free, 20-minute discussion. (If we aren't the right fit, we tell you immediately).

2. Find

The Bottleneck Audit maps your operational leaks.

3. Fix

A written scope, a fixed quote, and the build.

4. Run

Seamless handover and training. You take the keys.

The Bottleneck Audit

Before building anything, we follow your real jobs to measure where time actually goes, not where it should go. We deliver a plain–English map of your leaks and rank the top three fixes by payoff and effort.

Price	Timeline	The Guarantee
From A$990 (Small business, one location)	Delivered in about **2 weeks**.	The entire audit fee is credited against any build that follows.

Clear scopes. Written quotes.

Websites

From **A$3,500**

- Built for search visibility.
- Enquiry flows that actually reach the owner.

Automations

From **A$6,500**

- Connect the tools you already pay for.
- Data and work move on their own.

AI Builds

From **A$12,000**

- Custom AI assistants and workflows.
- Answer enquiries, sort leads, and draft replies.

All prices in AUD. No GST added. Final price defined by the fixed scope.

You own it. No lock-in.

1. **The Accounts:** Registered in your name, under your control.

2. **The Data:** Stays entirely in systems you control.

3. **The Code:** Yours to keep when the build is done.

We aren’t tied to one tool. If the smartest fix for your business doesn’t require AI, we will say so.

Things we've built that work today.

Ashika

Built a comprehensive hire storefront featuring a responsive web interface with distinct customer, admin, and seller areas.

Homsha

Developed a modern website for a Sydney custom home builder designed specifically to turn project views into qualified enquiries.

App Store

The same engineering team behind live iOS utility apps currently available on the App Store (Falah, Take a Break).

Ready to find the bottleneck? Let's talk.

Book your free 20-minute fit call. If we aren't the right agency for your specific problem, we will tell you straight away.
